

Pragnesh N Ramani

Email: pragnesh.ramani002@gmail.com

Contact no: +91 9725892876

Results-driven individual with 6+ Years of experience facilitating cutting-edge engineering solutions with a wide range of software/web application and technology skills. Proven ability of full stack expertise to build quality applications in Education, Medical, e-commerce fields.

- ✓ Effective professional communication skills
- ✓ Requirement Analysis & Design
- ✓ Build Business logic for the application
- ✓ Maintaining of User Manuals and Training Materials
- ✓ Revise Programs for Corrections, Enhancements, or Environment Changes
- ✓ Flow charts of the projects

SKILL HIGHLIGHTS

Hard Skill

- ✓ Python, Django, Flask, NodeJs
- ✓ React, Vue Js
- ✓ HTML, CSS, JavaScript, JQuery, XML
- ✓ AWS, Azure
- ✓ MySql, Postgres, MongoDB
- ✓ Git, Jira Project Tracking tool
- ✓ REST API Design & Development
- ✓ 3rd Party API Integrations (Payment Gateway, Data Migrations)

Soft Skill

- ✓ Critical Thinking
- ✓ Good Decision Maker
- ✓ Problem Solving Abilities
- ✓ Teamwork
- ✓ Flexibility
- ✓ Team Lead

PROFESSIONAL EXPERIENCE

SDE 2, 08/ 2021 to Present | Geeks Invention LLC, Ahmedabad, Gujarat

- Project Module Planning (Requirement analysis & Design)
- Lead Team of 2-3 people
- Client Interaction/Requirement Understanding.
- Prepared Details reports including project Specification and activities.
- Requirement Understanding.
- Convert Figma to HTML pixel perfect design
- Developing and maintaining the front-end/back-end functionality of the website.
- REST APIs Design and Development.
- DataBase Design and Creation.

Senior Software Engineer, 01/2019 to 08/2021 | Citrus bug Technolabs , Ahmedabad, Gujarat

- Project Module Planning (Requirement analysis & Design)
- Client Interaction/Requirement Understanding.
- Prepared Details reports including project Specification and activities.
- Developing and maintaining the front-end/back-end functionality of the website.
- REST APIs Design and Development.
- DataBase Design and Creation.
- R&D and Develop 3D visualization of Data and Maintain neo4j DataBase Data.

Software Engineer, 01/2017 to 01/2019 | TrellisSoft Engineering Services Ltd. , Gandhinagar, Gujarat

- Project Module Planning (Requirement analysis & Design).
- REST API Design & Development.
- Database Design and creation, Data Migration Process and prepared scripts.
- Prepared Details reports including project Specification and activities.
- Requirement Understanding.
- R&D and Integration of 3rd Party APIs.
- Create a Complex Parser for XML, H17 Data.
- Documented Software and technical specifications.

PROJECT DESCRIPTION

Project 1 Payvit ([Payvit](#))

Implementation Platform: React, NodeJs, MongoDB, AWS

Description: Payvit Provides Micro/Small/Medium even some big businesses to manage daily payments with different ways like By Creating Invoice, Product Checkout page and for donation use Peyme Link with Flexible enter amount option with secure payment providers. As they also offer Debit Card, Wallet to manage transactions & also rewards on Collecting payments And for that we made Admin, Business & Customer friendly Web/Mobile application which makes business owners day to day payments easier.

Role: Here my role is as Full stack developer to create APIs in NodeJs, Integration of APIs in frontend in React and Create Pixel perfect HTML from Figma and Handle Deployment and managing team of 2-3 people.

Project 2 WhitehatJr ([WhiteHatJr](#))

Implementation Platform: React, NodeJs, MySql, MongoDB

Description: This Application is used for Enrolling your child for online Math, Music or Coding classes at **WhiteHat Jr**. Also Providing B2B solutions for schools to manage classes flexibly with Dashboard and Statistics. Whitehat jr also provides Unit test After a few classes to students to manage their track records by project completion and report card with Student statistics.

Role: Here my role is as Full stack developer to create APIs in NodeJs, Integration of APIs in frontend in React and Create HTML from Figma.

Project 3 Azenia Biller (Equity Bank) ([Equity Bank](#))

Implementation Platform: React Js, Material UI, Typescript

Description: Azenia Biller - Equity bank provides Bank account to manage end to end business finance e.g. Invoice, Customers, Linked Billing Accounts etc. Here we have developed a Desktop application for Biller Manager who will manage businesses who own the Equity Bank Account and manage Its Invoices, Users, Customers who can pay their bills, See Statements in chart / Document format in a secure way which makes the billing process easy for customers and business owners.

Role: Here my role is to integrate pixel perfect figma design to react reusable components using material UI and integrate APIs and dynamic forms based on API response.

Project 4 Intelia ([Intelialia](#))

Implementation Platform: Vuejs, Quasar, SCSS

Description: Application is for To provide digital solutions that connect livestock value chain players and empowers them with real-time, actionable insight that fosters sustainable production. This application provides statistics in graph / chart forms to customers to manage their poultry farms productions.

Role: Create Pixel perfect Design from Figma using Quasar framework and Integrate with Vujs. and APIs integrations, manage tasks with JIRA. and manage code base with Gitlab.

Project 5 Spanflug ([Spanflug](#))

Implementation Platform: React, Python, Flask, PostgreSQL

Description: Application is for The automated Spanflug process makes the procurement of individual turning parts and milling parts faster and easier than ever - whether prototype or series production. With our platform technology, we intelligently link demand and manufacturing capacity, enabling the most efficient transaction between customers and manufacturing operations.

Role: Create APIs with Flask, Integration of APIs in frontend with React, manage tasks with JIRA. and manage code base with Github.

Project 6 Carepointe, A Patient-Centred Care Management System (www.carepointe.cloud)

Implementation Platform: Php, Python, Django, AngularJs, MySQL

Description: Carepointe is Patient, Provider and Payer facing management system contain different modules like Care management workflows; Appointment Management; Event Alerts; Analytics; Remote patient monitoring; Patient Portal; Billing system for doctors; Care plan creation; different statistical dashboard according to user; Staff/user management; 3rd party medicare software Integrations and also migration scripts.

Role: Create APIs with Python/Django, Integration of APIs in AngularJs, Design & manage cron jobs and Data Parsing scripts & manage tasks with JIRA. and manage code base with Github.

Project 7 Mobicoach, Live Remote Coaching (www.mobicoach.com)

Implementation Platform: Python, Django, AngularJs, MySQL

Description: Project for Coaches/Instructors of golf. Application contains Coaches/Instructor management portal and Informative website. Coaches are able to set the availability day/time, webinar session, cost of session from the portal. There are functionalities for the customer/student to be able to sign up in the portal and search/filter/select the coaches with a session time that's convenient. Also customer can pay online payment (PayPal)

Role: Create APIs with Django rest framework. And Database design.

ACADEMIC QUALIFICATIONS

Qualification	School/College	Year	Percentage/ CGPA(CPI)
B.E. Information Technology	LJ Institute of Engineering and Technology, Gujarat Technological University	June-17	9.07(8.63)
H.S.C Science	Punit Higher Secondary School, Ahmedabad, GS/HSEB	June-13	72%
S.S.C	Tagore Smruti Vidhyalaya , Ahmedabad, GSEB	June-11	89.40%

PERSONAL DETAILS

Name: Pragnesh Narendrabhai Ramani
Gender: Male
Nationality: Indian
Date Of Birth: 24th June , 1996
Languages known: English, Hindi, Gujarati
